MILOŠ GREBEC

Freelance Full-Stack Developer | React · TypeScript · Laravel

Serbia (Remote) • grebecmilos0@gmail.com • milosgrebec.com

PROFESSIONAL PROFILE

Full-stack developer with experience delivering and maintaining a European B2B software platform. Skilled in React/TypeScript interfaces, Laravel APIs, and MySQL-backed business workflows, including security, testing, integrations, and Docker-based deployments. Available for project-based freelance collaboration.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Software Developer

Confidential European B2B Client | 2025 – 2026 | Project-based

- Build and improve features for a business web platform using React, TypeScript, PHP, Laravel, and MySQL.
- Develop REST APIs, administrative workflows, permission-based access, reporting features, and application data flows.
- Implement and maintain authentication and security functionality, including multi-factor authentication and authorization checks.
- Work with Docker, Linux, Nginx, and application configuration to support staging and production deployments.
- Integrate EVM-compatible smart-contract functionality with web application services and JavaScript-based integrations.
- Coordinate directly with the client on requirements, feature delivery, code reviews, bug fixes, and release readiness.

SELECTED INDEPENDENT PROJECT

Angelus 2.0 — Custom Computer Vision Toolkit

Independent Python project | TensorFlow Object Detection · KivyMD

- Built a desktop application to create, train, and test custom object-detection models with Python and the TensorFlow Object Detection API.
- Designed a KivyMD interface for dataset preparation, model selection, and training; used LabelImg for image annotation.
- Integrated live camera inference and testing of trained models, with support for models from the TensorFlow Model Zoo.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS
Backend: PHP, Laravel, REST APIs, Node.js, MySQL, Redis
Infrastructure & tools: Docker, Nginx, Linux, Git, GitHub
Additional: Python, TensorFlow, KivyMD, Solidity, EVM integrations, C, C#

EDUCATION

Faculty of Technical Sciences, University of Novi Sad

Applied Software Engineering | 2025 – Present
