MILOŠ GREBEC

Freelance Full-Stack & Blockchain Developer | React · Laravel · Solidity

Serbia (Remote) · grebecmilos0@gmail.com · milosgrebec.com

PROFESSIONAL PROFILE

Full-stack developer with 3+ years of programming experience and commercial delivery for IQOSYS SAS (France). Experienced with React/TypeScript applications, Laravel APIs, Solidity smart contracts, security improvements, automated testing and Docker-based releases. Available for remote freelance and project-based work.

PROFESSIONAL EXPERIENCE

Freelance Full-Stack & Blockchain Developer

IQOSYS SAS (France) · iqosys.com | 2025–2026 | Project-based | Client reference available upon request

- Built and improved B2B web platform features with **React, TypeScript, Laravel and MySQL**, including REST APIs, administrative workflows and role-based access.
- Developed **Solidity smart contracts** for token-related workflows, escrow mechanisms, access control and multisignature authorization.
- Integrated EVM-compatible contracts with backend services and frontend user flows, including contract interaction and transaction-related functionality.
- Worked on multi-factor authentication, authorization checks, application security fixes and reliability improvements.
- Wrote and ran automated tests, resolved bugs, and supported staging and release preparation using **Docker, Linux and Nginx**.
- Collaborated directly with the client on requirements, technical decisions, code review feedback and delivery priorities.

SELECTED INDEPENDENT PROJECT

Angelus 2.0 — Computer Vision Toolkit

Independent Python project | TensorFlow Object Detection · KivyMD

- Built a desktop application for preparing datasets, training custom object-detection models and testing them with live camera input.
- Designed the KivyMD workflow for annotations, model selection and inference, integrating the TensorFlow Object Detection API.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS

Backend: PHP, Laravel, REST APIs, Node.js, MySQL, Redis

Blockchain: Solidity, EVM smart contracts, contract testing, Web3 integrations

Infrastructure: Docker, Linux, Nginx, Git, GitHub

Additional: Python, TensorFlow, KivyMD, C, C#

EDUCATION

Faculty of Technical Sciences, University of Novi Sad

Applied Software Engineering | 2025–Present

LANGUAGES

Serbian (native) · **English** (professional working proficiency)
